Date: 22/Dec/2021

Homelessness has risen, and many citizens are concerned about this issue

By June 30th 2021, Masaka Central Police reports shows 4 persons mainly kids go on street turning into a street kid. Under Rehabilitation Centres in Masaka by 1st July there are 1400 homeless kids. And it's estimated over 200 kids are homeless by today 22nd October 2021 in Masaka/City

Kisswa Minds Organization, we are concerned and ready to integrate the homelessness with their families or else with foster homes. If enough funds got, we can build a home that can accommodate some of them who have completely failed to be restored so that they can have care and education from that home

Kisswa Minds Organization targets 250 homeless persons/kids. These being integrated to their families and less than ten (10) or non being given a foster home. This is because the best way to help them is by integrating homelessness to their families

Kisswa Derrick will get consent and written permission from the Probation Officer Masaka District/City. This will give a go ahead to some of the activities below;

- Having a good number of Social Workers basing on the available resources to work with them in the process of identifying foster homes. This is where we shall have those willing to stay with the homeless kids as we do the counselling to the kids
- Identifying the kids' homes. Each kid or homeless person given a foster home with aid of Local Leaders, and other community members will work with us in the process of identifying the kids' homes.
- Making follow-ups to foster homes. This will help us in counselling, educating, and taking care of the kids

Email: info@kisswaminds.org

- Taking kids to their respective families.
- Making follow-ups to families

As we identify families, we also get reasons why kids left their homes. Counselling will always be done to both home caretakers/parents/guardians, and the restored kids. Follow-ups and counselling will always be done on weekly basis up to when the situation normalizes

Kisswa Minds Organization will know its success basing on the number of integrated kids and families. The outcome basing on the number of our target population in relation to the activities of the project will show the success of our organization and project

Interventions will be got basing on the analysis made between the kids' families and the kids. Any intervention will base on critical analysis of all situations. Homelessness will no longer be available in the regions of Masaka/City. Kisswa Minds Organization will also set clear grounds that aid in reducing family conflicts which may led to runaways from families
